

Reliable, durable and **safe...** when standards matter

Scapa T3601 is a white self-wound, polyethylene-coated cloth tape that combines high durability with high fire retardant properties. Coated with a flame retardant rubber adhesive, T3601 ensure its reliable use in markets such as aerospace, shipbuilding, construction and the military, where there is an increasing awareness of fire protection and safety. It is also printed with the Federal Aviation Regulation (FAR) 25.853(a) approval.

Scapa T3601 is now produced at the European Headquarters in Manchester, England, providing enhanced service and availability for the European market.

Scapa T3601 fire retardant cloth tape

- Fire retardant adhesive
- Very light and conformable
- Excellent tear and unwind
- Meets the requirements of FAR 25.853(a) fire test
- Printed with FAR approval to allow easy recognition that a reliable product is being used
- Used extensively in shipbuilding and aerospace markets
- Easy to apply
- Good waterproof properties

T3601 fire retardant cloth tape

Scapa T3601

Product Reference	Tensile Strength (N/cm)	Adhesion to Steel (N/cm)	Service Temperature (°C)	Total Thickness (mm)
T3601	35	6.0	0 – 70	0.22

Applications

- Installation of aircraft cargo liners
- Temporary joining of fireproof panels during shipbuilding
- Repairing carpet
- General applications in construction industry such as reinforcing, wire harness holding, sealing partitions and joints and temporary repairs
- Waterproof properties to allow protection during welding, grinding, cleaning and sanding processes
